

Jungle

Enabling the future of
Manufacturing with **Robotics**

Connecting robotics **developers** to **Industry**

So, what is Robofactoring?

It's a software defined manufacturing process of using **Robotics and AI technologies** within production of goods.

→ **Flexibility**

Easy to adapt without extensive capital expense

→ **Time to Market**

Quicker to bring a product to market

→ **Autonomous**

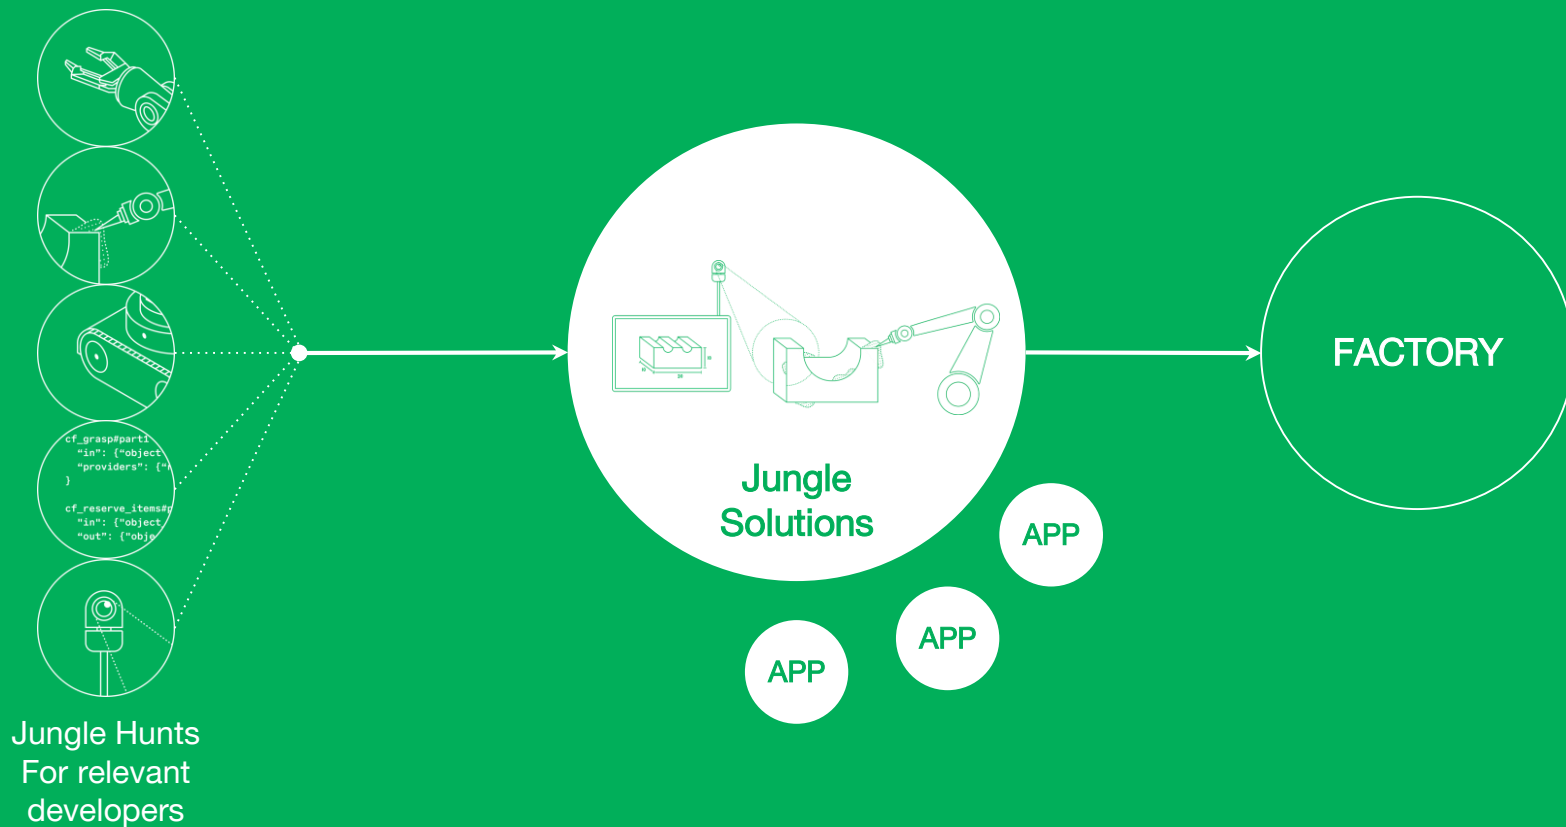

Giving us our time back, to do greater things

The number of combinations of options for the BMW 6 series was **33 times greater** in 2015 than in 2008

Customers	Factory Owners
<ul style="list-style-type: none">• Customers demand products quicker to market	<ul style="list-style-type: none">• Manufacturing lines are too rigid
<ul style="list-style-type: none">• Customers demand high variation and customisation	<ul style="list-style-type: none">• Need to cut production costs
	<ul style="list-style-type: none">• Need to increase quality and reproducibility of products
