

A photograph of a modern, multi-story building with a curved glass facade, illuminated from within at dusk. The building is surrounded by greenery and a fence. In the foreground, there are several bright, curved light trails in shades of yellow and green, suggesting motion or energy. A green banner is overlaid on the left side of the image.

# Who are we?

Industry experts  
in automation

Founded in 1968

Active worldwide

In private ownership

250 million euro  
turnover

87% export

20% R & D rate

1100 employees

**KEBA**

Automation by innovation.

# Mission

VISION  
21

Technologies of KEBA  
help people to make the world  
of life and work easier.

# Market leader in TP

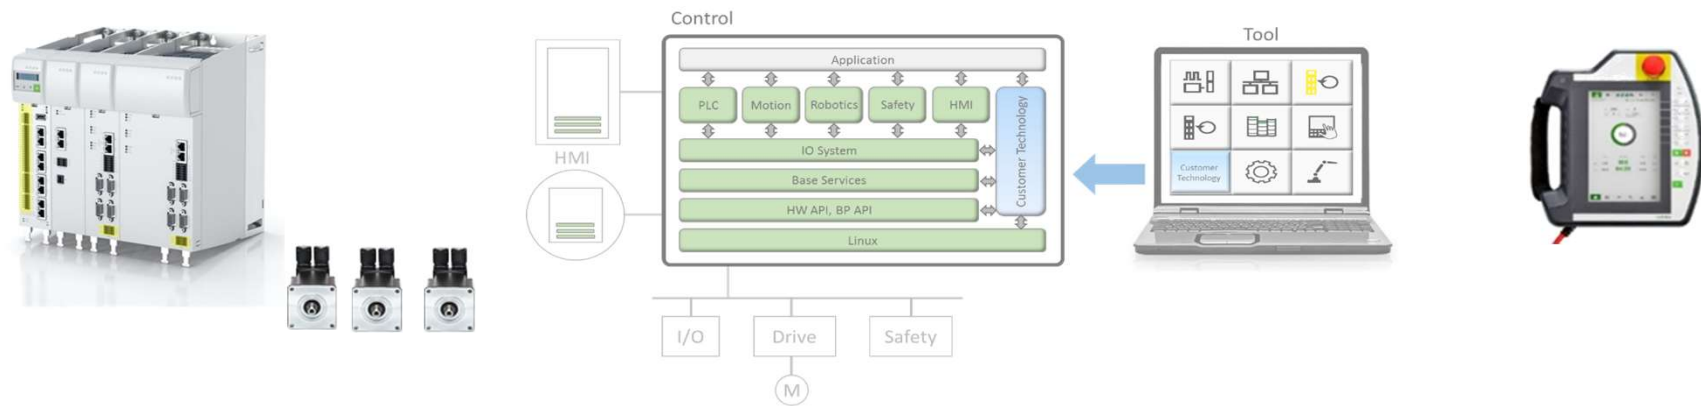

# Innovative and easy to use

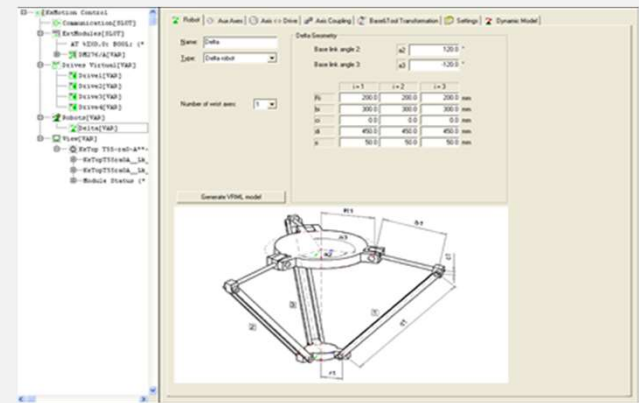

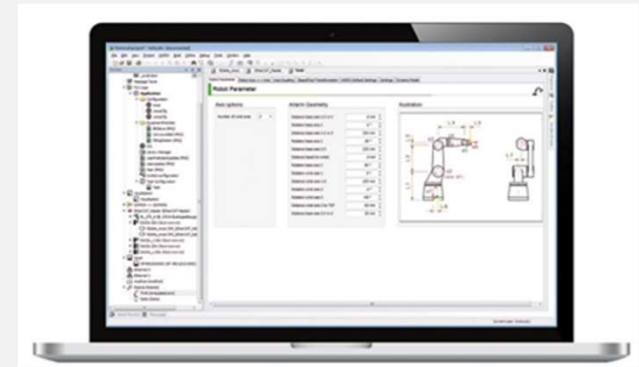

# KeMotion – total robotic solution

# KeMotion – easy and fast

Easy robot configuration  
in dimension, axis and mechanical couplings.  
Easy setting and program generating  
Simulation tool

# Precise movement and combination

PLC + Motion

Ready to use Libraries

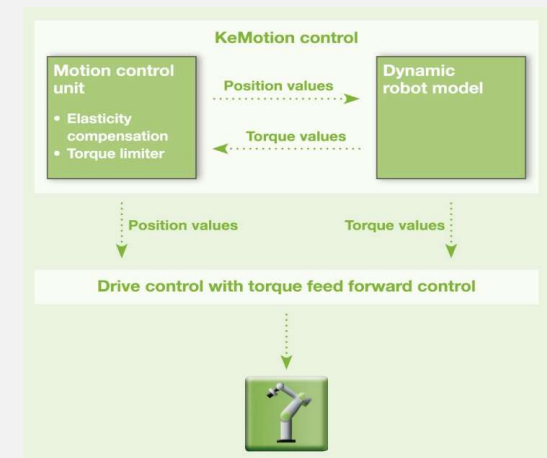

Dynamic robot model

Online calculation

Codesys + PLC open

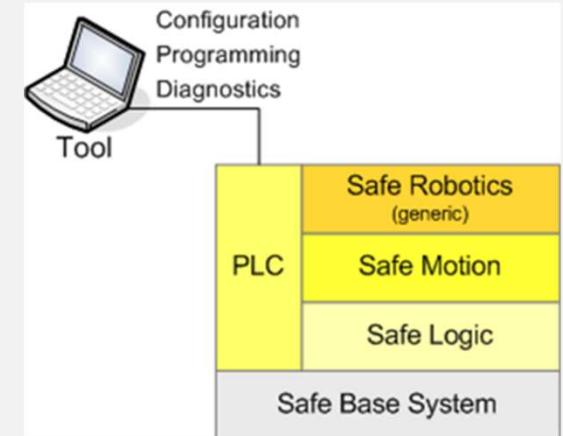

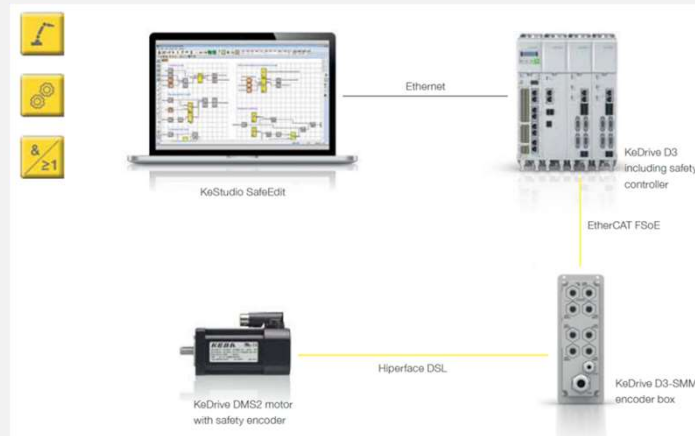

Wizards

Consideration of elasticity

# KeMotion – Safety

- Safe robot standstill
- Safely limited Cartesian speed
- Safe zones, safety limited Cartesian position
- Safe tool orientation
- Safe Changing Unit and Safe Tool

# KeMotion for a wide range of applications

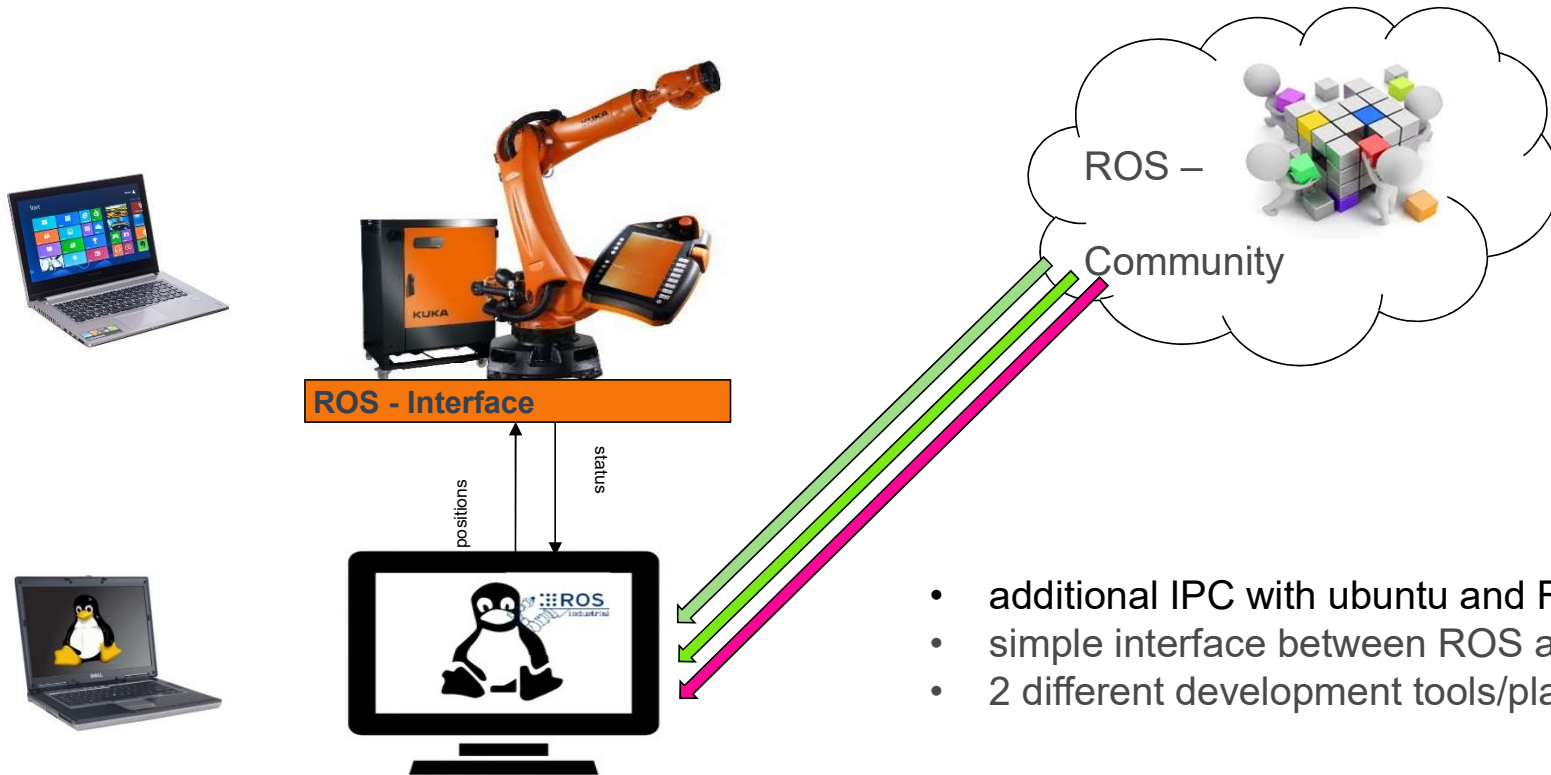

# Open Source is not new to us

# KEBA - ROS

# Standard market solution

- additional IPC with ubuntu and ROS necessary
- simple interface between ROS and robot controller
- 2 different development tools/platforms (Windows/Linux)

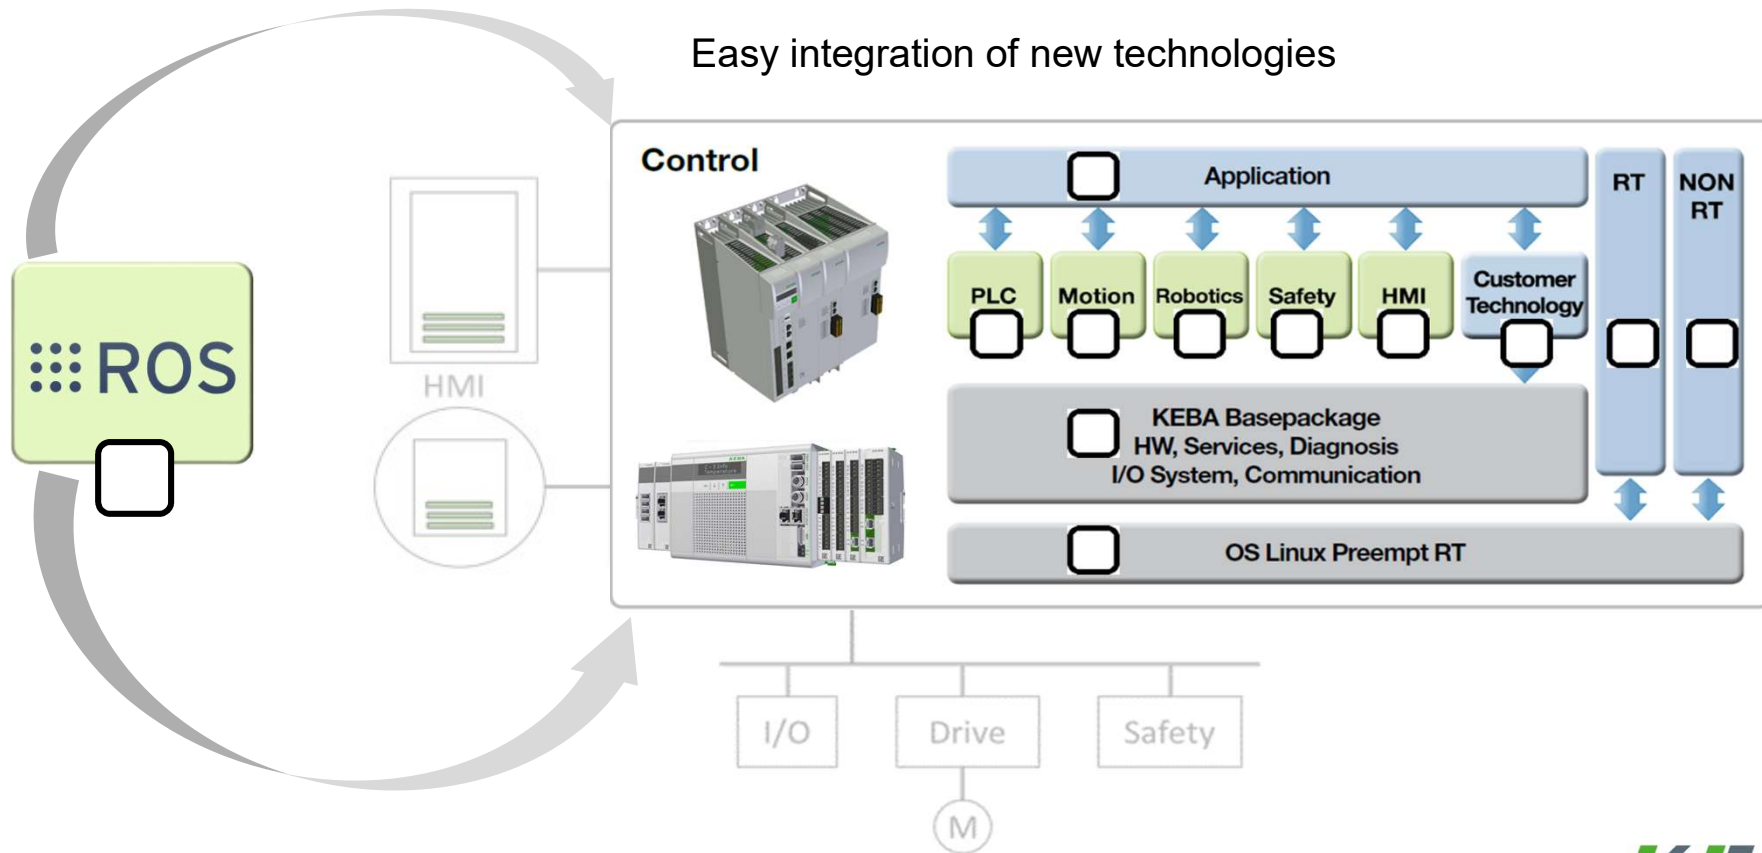

# Unique integration

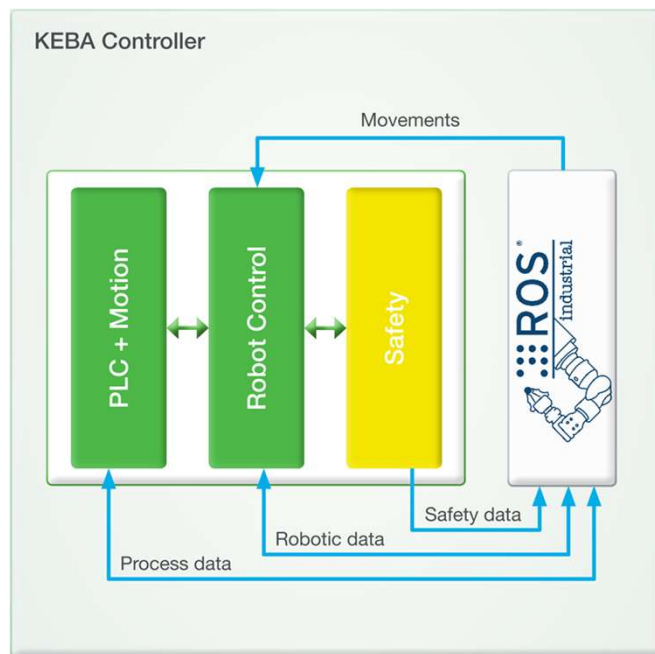

1 Tool + 1 Control unit

# Open control architecture

Easy integration of new technologies

# Basics

Deliver a versioned collection of the main ROS packages

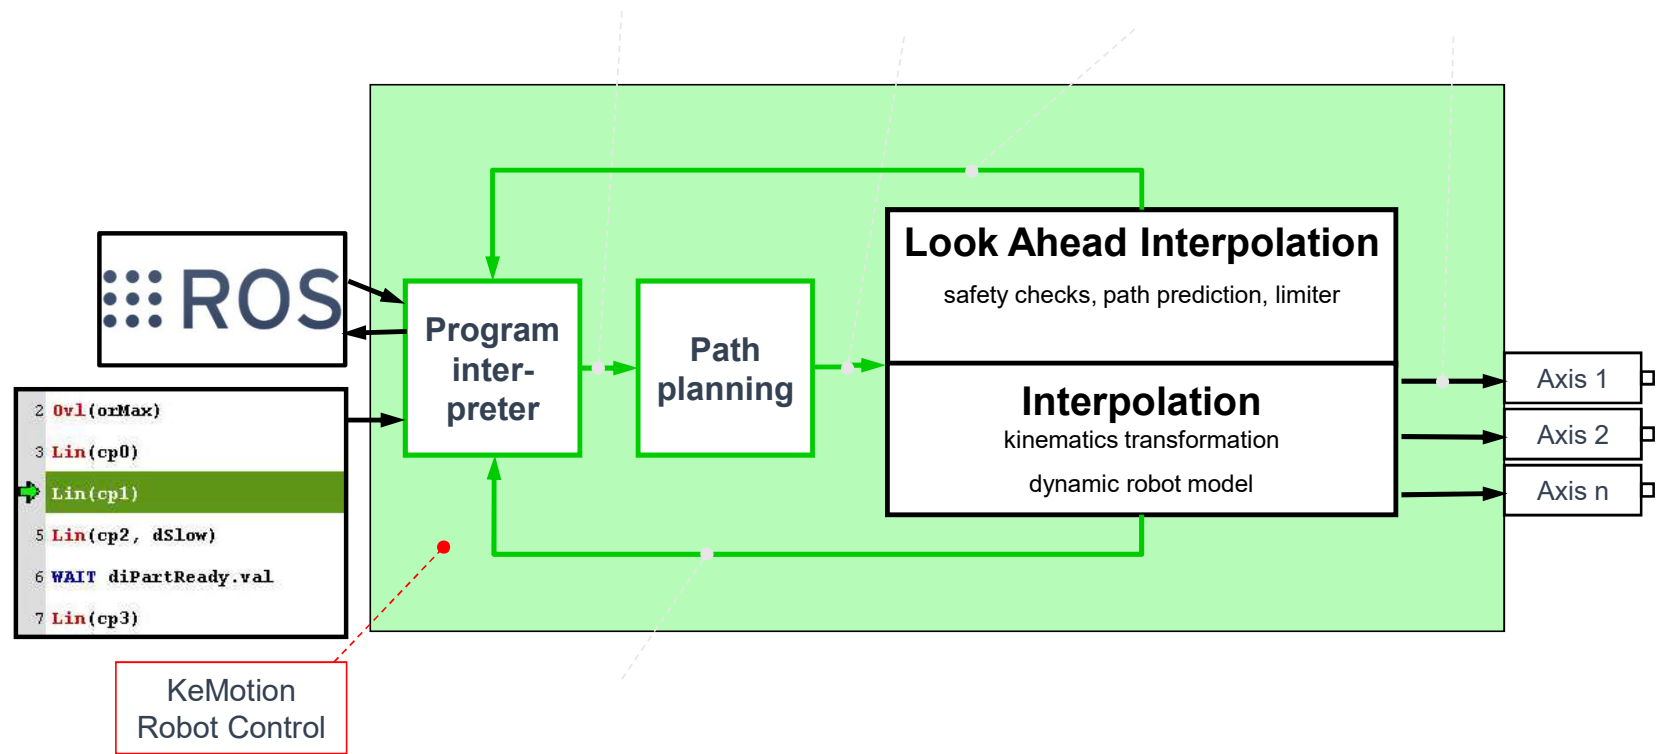

✓ ROS Softwareunit

Offer a possibility to move the robot out of ROS

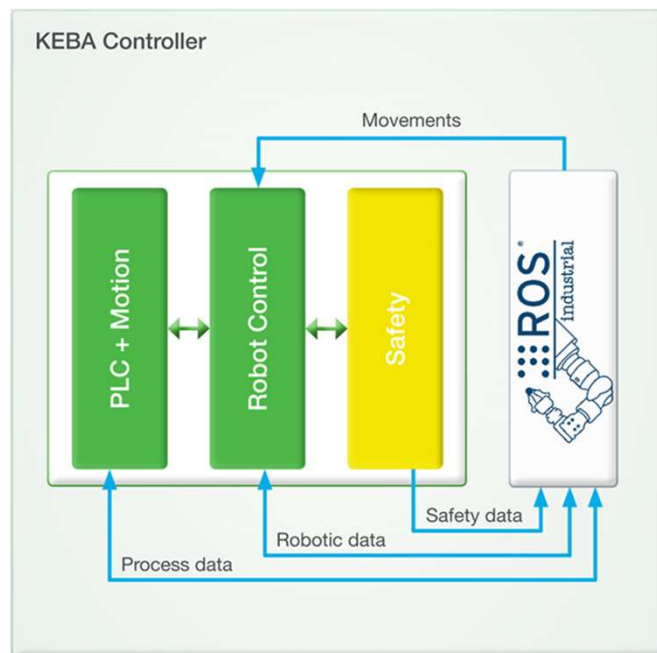

✓ Deliver an interface to our Robot Control

# Integration of ROS

# Additional features

Offer a possibility to trigger PLC applications out of ROS

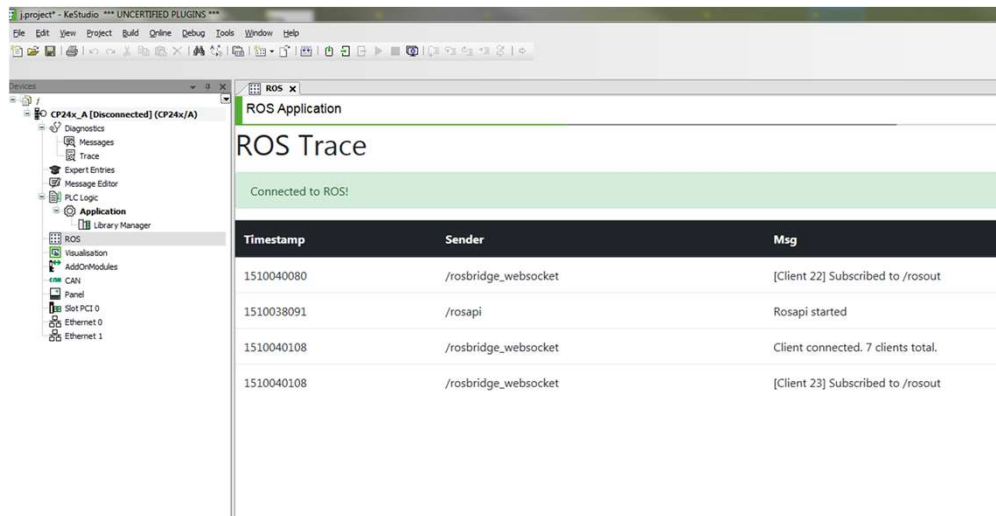

- ✓ Establish an ROS-interface to our PLC variable-tree

Offer an easy to use “rmi\_driver”

- ✓ support Cartesian movement / positions
- ✓ Multi robot support
- ✓ Plugin-based to easily add commands
- ✓ Access to all robot controller's features with flexible messages

Source : [https://github.com/smith-doug/rmi\\_driver](https://github.com/smith-doug/rmi_driver)

# Additional features

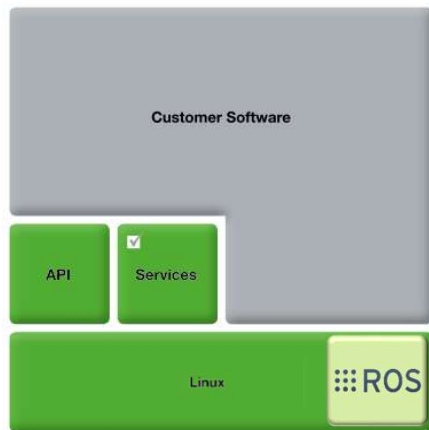

Offer a possibility to upload an application to several units

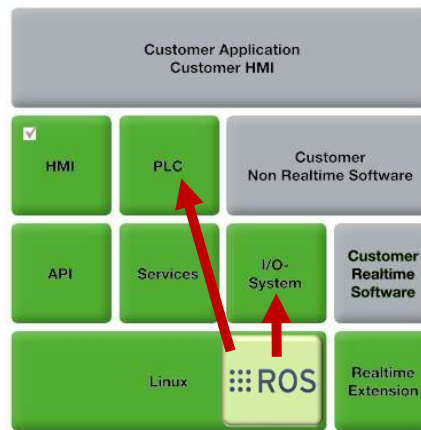

- ✓ Develop a plugin for our PLC configuration Suite (KeStudio)

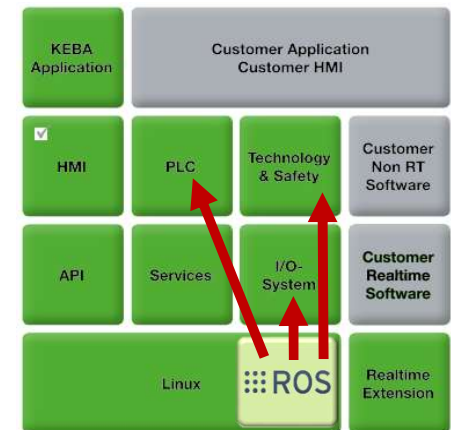

# Integration Levels

- ROS core on IPC
- No interfaces

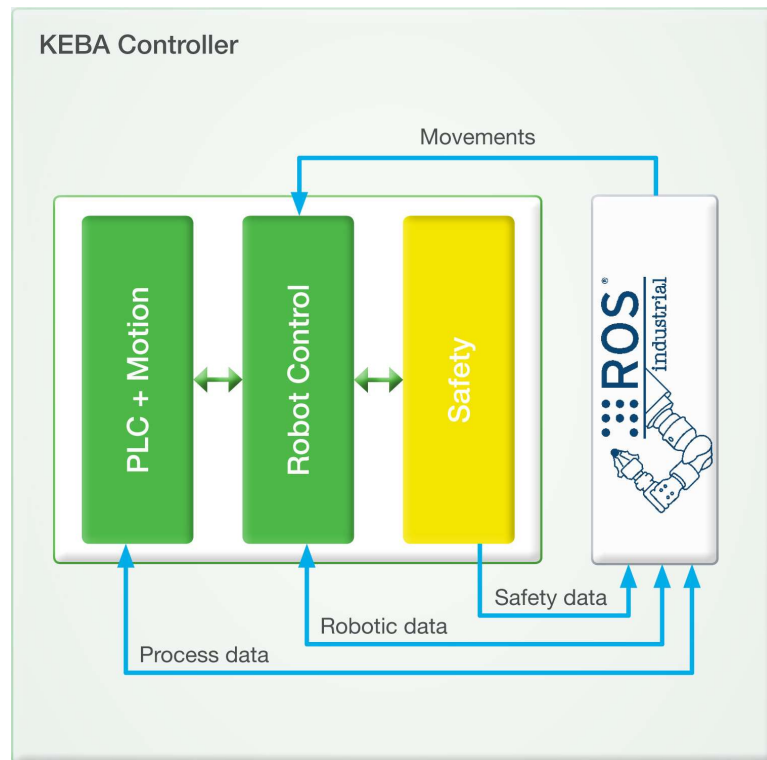

- ROS interface to basic system

- Full integration
- ROS with KeMotion technology features

# KEBA solution

- all in one platform
- PLC, Robotik, Safety, ROS
- 1 development tool for robotics and ROS
- no additional ROS PC
- full access from ROS to KEBA controller

A man in a grey shirt and glasses is shown in profile, holding a handheld remote control device. He is interacting with a blue industrial robotic arm. The arm is mounted on a base and has a white cylindrical tool at its end. A green glowing arc indicates the movement of the tool. The background is a blurred industrial setting.
